PROFESSIONAL SUMMARY

Business Analyst with 7.5 years of experience in GIS, utility data transformation, electrical network integration and technology-led solutions for UK electricity clients. Expertise with customer engagement, data-driven problem solving and cross-functional delivery.

SKILLS

Data & Integration : SQL, Python, SAP-GIS Integration
AI Skills : Skills, MCPs, Workflows and Agentic Orchestration
Visualization & Reporting : PowerBI, Tableau, Advanced Excel
Collaboration Tools : SharePoint
GIS Platforms : ArcGIS Pro, QGIS, Smallworld (GE), FME, ESRI

CORE COMPETENCIES

- Advanced Data Analysis using SQL, Python and AI integration
- Spatial Data Digitization & QA
- Data Transformation & Audit Readiness
- Testing, Documentation & Knowledge Management
- Client & Stakeholder Engagement
- Team Leadership, Mentoring & Training

EXPERIENCE

Senior IT Analyst & Technical Lead, Tata Consultancy Services (TCS), India November 2018 - June 2026

- Led GIS data transformation and analytics initiatives for UK utility clients, delivering high-quality, audit-ready solutions aligned with business, operational, and compliance requirements.
- Delivered digitization, polygon creation, migration, validation, and SAP integration across ArcGIS, QGIS, Smallworld, and ESRI platforms.
- Applied SQL-based data analysis, validation, and reconciliation to identify data inconsistencies, improve data integrity, and support accurate reporting and decision-making.
- Proposed a semi-automated GIS solution that reduced manual effort and improved turnaround time by approximately 40%, facilitated team adoption through training and knowledge transfer.
- Established quality-control frameworks, validation standards, and data-quality metrics, improving operational consistency, data reliability, and customer satisfaction.
- Served as a Geospatial Technology Subject Matter Expert (SME) and primary client SPOC, acting as the key liaison between UK-based clients and delivery teams, resolving 900+ technical queries and providing guidance on complex project and domain challenges.
- Led data-quality and consistency initiatives involving 1,900+ records, improving accuracy, reliability, and downstream reporting outcomes.
- Developed Power BI dashboards to provide visibility into data quality, project performance, and resource utilization, enabling data-driven decision-making.
- Mentored and trained 150+ GIS and data professionals, strengthening technical capabilities, knowledge sharing, and team performance.
- Contributed to ISO audit readiness, knowledge management, and best-practice initiatives, while receiving Service & Commitment, Best Team, and Star-of-the-Month recognition.

EDUCATION

Santa Clara University — Santa Clara, CA
Master of Science in Business Analytics — December 2027
SASTRA University — Thanjavur, India
Online Master of Business Administration — CGPA: 8.93/10 — June 2026
Bon Secours College for Women, Bharathidasan University — Thanjavur, India
Bachelor of Computer Applications — CGPA: 8.05/10 — May 2018

ACADEMIC PROJECTS

Supermarket Sales Data Analysis: Python, Pandas, NumPy, Matplotlib

- Developed an analytics python workflow that cleans, validates, transforms and visualizes over 1000 retail transactions across 17 dimensions
- Analyzed over $300K in sales, identified top revenue-generating products, analyzed volume per category, derived customer and payment trends

AI-Driven Consumer Review Analytics: Predicting Product Returns & Enhancing Reverse Logistics, SASTRA University

Analyzed consumer review data to identify sentiment patterns and return-risk drivers, applying AI-driven analytics to support product-return prediction and reverse logistics optimization.

- Analyzed 500 customer reviews using Python, TextBlob, and Google Colab to perform sentiment analysis and polarity scoring.
- Identified recurring return drivers including product quality issues, size/fit mismatch, product damage, and description mismatch.
- Integrated analytical outputs into Power BI and Tableau to visualize sentiment trends, return-risk patterns, and actionable business insights.
- Combined review analytics with survey insights from 103 online shoppers to evaluate consumer review behavior, return patterns, and acceptance of AI-driven recommendations.
- Translated analytical findings into business recommendations for proactive return management, product-quality improvement, and reverse logistics efficiency.

CERTIFICATIONS

- AI4ICPS: Hands-on AI for Real-World Applications – IIT Kharagpur
- Generative AI (Architecture & Foundations) – TCS
- Cybersecurity & Infrastructure Data Security – TCS
- Tata Data Visualization – Forage (2026)Created data visualizations, prepared client questions, and designed executive decision-making visuals
